RESOLUTION ON THE REPORT OF THE DEPARTMENT OF FISHERIES, BENGAL, BIHAR AND ORISSA, FOR THE

GOVERNMENT OF BENGAL.

DEPARTMENT OF AGRICULTURE AND INDUSTRIES.

CALCUTTA, THE 15TH DECEMBER 1921.

RESOLUTION-No. 4943Fish.

READ-

The Report of the Department of Fisheries, Bengal and Bihar and Orissa, for the year ending 31st March 1921.

On the inauguration of the Referenced Government the administrative control of the Fisheries. Description of the Revenue Department to the Agriculture and Public Works.

2. The depletion of superior staff reported in the previous year continued during the year under review and consequently the work of the department was seriously handicapped and no important project for development could be undertaken. Pending the appointment of a permanent Director of Fisheries the control of the department has been temporarily placed under the Director of Agriculture with effect from the beginning of the year under report. This arrangement is not suitable as a permanent measure inasmuch as owing to the expansion of the work of the Agricultural Department the Director of Agriculture is fully occupied with his own duties and cannot spare time for fisheries work; nor has he the requisite expert knowledge to direct the work of the Department of Fisheries.

- 3. Another factor which has affected the department was the decision of the Government of Bihar and Orissa to discontinue, with effect from 1st April 1921, the arrangement for the joint control of the Fisheries Department for the provinces of Bengal and Bihar and Orissa. This led to an examination of the whole question of the retention and re-organization of the Bengal Fisheries Department. The department has only been in existence for ten years, the staff even when at full strength is small, and it cannot as yet point to important practical achievements. It has therefore not succeeded so far in enlisting the support of public opinion. The reason for this is not far to seek. The work of the department falls into two main branches, research and demonstration, and research must necessarily precede demonstration Up to the present the officers of the department have been largely engaged in research. It is in the stage of propaganda and demonstration that the results of the researches of the department will become known to the public and be appreciated by them. In Bengal where fish forms an important part of the diet of the people an efficient department of fisheries has great possibilities before it, and in course of time will undoubtedly accomplish work of the greatest practical value to the people. This view has led the Hon'ble Minister in charge to decide on the retention of the Fishery Department with its former staff of one Director and two Superintendents, and the Secretary of State has been moved to sanction the post of a Director.
- 4. The absence of a permanent Director and the want of laboratory accommodation hampered scientific work during the year under report. It is however satisfactory to note that definite results have been obtained in carp cultural experiments. Not only have the carp been observed to breed in confined waters under certain special conditions, but it has also been found possible to fertilize the eggs artificially by stripping the male and the female. The question of establishing a carp-rearing station has been postponed pending the recruitment of a Director. Interesting results which may lead to important developments were also obtained from inquiries into the possibility of cultivating mussels in confined waters.

Hilsa investigations have not made much headway and it is clear that prolonged enquiries and investigations will be necessary before a solution of the problem of hilsa culture is attained.

- 5. The District Fishery Officers worked satisfactorily during the year. A survey of Government and private fisheries was undertaken in the districts where these officers have been appointed, and much useful information has been gathered which will prove of practical value in the future. A special study of the economic condition of the fishermen was also made and as a result particular attention was directed to the establishment of fishermen's schools and co-operative societies. Twenty-six new fishermen's co-operative societies were registered—16 in Bengal and 10 in Bihar and Orissa. The total number of such societies in Bengal at the close of the year was 47 as against 32 in the previous year. Experiments in the education of fishermen's children were carried on in the Dacca district and net-n aking and boat-repairing have been introduced experimentally in the curriculum of the Rohitpur School.
- 6. During the carp season the yur under review the total number of selected fry supplied to the public the department was 517,000 against 880,500 in 1919-20. The falling-of the monsoon which interfered with the direction of fry.

- 7. The statistics of fish traffic into Calcutta during the year under review show imports of 370,119 maunds as compared with 312,975 maunds in the preceding year. This is the largest quantity imported since the collection of statistics was inaugurated in the year 1916-17. Bulletin No. 17 published by the department furnishes detailed information on the subject.
- 8. The Hon'ble Minister has much pleasure in acknowledging the services of Mr. R. S. Finlow and Mr. G. Evans who have successively held charge of the department in addition to their own duties as Director of Agriculture, Bengal, and of their assistants in the difficult conditions which prevailed during the year. His acknowledgments are also due to Dr. Baini Prashad for his continuance of research work on the fishes of these provinces after he left the department.

By order of the Government of Bengal (Ministry of Agriculture and Public Works),

> J. A. L. SWAN, Secretary to the Government of Bengal (offg.).

more than the common of the set will be provided to The report of the Department of Industries, Bengal, for the year ending 31st

and the second second second second

Prior to the 1st January 1920, a temporary post of Director of Industries with a small staff had been sanctioned for Bengal. The appointment how-ever was combined with that of the Controller of Munitions, Bengal, and the work of the latter office was so heavy that it practically absorbed the whole time of the officer holding the combined appointments. From the 1st January 1920, a permanent Department of Industries was sanctioned for Bengal, and Dr. D. B. Meek, who had held the temporary post, was appointed to be permanent Director. The separation of the work of the Director of Industries from that of the Controller of Munitions was gradually effected

during the year under report.

2. The work of the Industries Department falls into two broad groups, namely, Reserved Subjects and Transferred Subjects. On the 'reserved' side the Director controls the work of Factory, Boiler and Electricity Inspections, the prevention of smoke nuisances and investigations into labour problems. On the 'transferred' side the two main subjects are the Development of Industries and Technical and Industrial Education. The report under review deals with the work of the Director in connection with the 'transferred 'subjects. To assist the Director in the discharge of his duties, an Advisory Board of eleven members, mostly business men with wide experience of the industries of the province, has been appointed and has already proved of great value to the Director. The staff of the department is being gradually organized. Towards the end of 1920, Mr. A. T. Weston was appointed Deputy Director of Industries. Five Circle Officers, one for each of the Commissioners' Divisions, have also been appointed. The Circle Officer acts as the local representative of the Director and is the channel of communication between the people and the department. He is entrusted with the collection and dissemination of intelligence relating to the general industrial conditions of his circle. He receives requests for assistance from the industrial public, makes enquiries and prepares and submits definite schemes to the Director. He is required to be in close touch with the industrial exhibitions promoted within his circle, and it is in contemplation to entrust him with the work of inspecting Industrial and Technical Institutions. For the expert supervision of these institutions, the Director has the assistance of Mr. W. H. Everett as Inspector of Technieal and Industrial Institutions. An Industrial Intelligence officer has also been appointed, but his time has been almost entirely occupied with the study of labour problems, and in particular with the collection of information relating to strikes. Since the close of the ar Government have sanctioned the appointment of an Industrial Engis and an Industrial Chemist. and an Industrial Chemist. These officers were urgently needed and appointment will greatly increase the utility of the department to the

4. Much attention has been given to the subject of weaving. The weaving expert, who had previously worked under the charge of the Director of Agriculture, was transferred to the administrative control of the Director of Industries from the 1st December 1919. Owing to the demand from all parts of Bengal for the revival of the hand spinning of cotton with a view to its adoption as a cottage industry, special attention was given to the introduction of improved charkas and to the demonstration of the manipulatory processes amongst the spinners. The attention of the Department has also been devoted to the introduction of improved hand-looms and weaving machinery. Improvements have been made in the fly-shuttle slay, the fly-shuttle loom and the pit loom. These improvements have been widely demonstrated throughout the province and have met with an encouraging reception.

5. The transfer of the control of technical and industrial education from the Director of Public Instruction to the Department of Industries was effected towards the end of 1920. Up to the present, the Director of Public Instruction has retained control of the Bengal Engineering College, Sibpur, and of the Asanulla School of Engineering. Dacca; but all other technical and industrial institutions in the province have been placed under the Director of Industries, and the transfer of these two institutions to his charge is now under the consideration of Government. An important development was the appointment of a strong committee under the presidency of Sir Rajendra Nath Mookerjee, K.C.I.E., to consider the establishment of a fully equipped technical school in Calcutta with the object of giving adequate theoretical instruction to the apprentices employed in the engineering works in and around Calcutta. The committee worked out a scheme, chose a site and approved of the plans for a building. The site which is centrally situated in Corporation Street has been acquired, and building operations will commence as soon as funds are available. The scheme for improving the training of apprentices in the railway workshop at Kanchrapara made some progress during the year. A hostel for Indian apprentices and a house for one of the teachers have been almost completed. In this case also the complete introduction of the scheme must depend upon the financial resources available. The improvement of mining education in the coal-fields has been under discussion for a long time. It was originally proposed that the cost of the scheme should be shared between this Government, the Government of Bihar and Orissa and the mining industry. The Government of Bengal have now decided to proceed with the portion of the scheme affecting this province. The mining interests have agreed to contribute to the cost of the scheme and the balance will be borne by this Government. The popularity of the Government Weaving Institute at Serampore continued during the year under report and a large 1, ober of applications for admission had to be rejected. A third-year course a sistruction in the higher classes was added to the former currier studies, and such subjects as mechanics,

mensuration, chemistry, dyeing, bleaching, etc., are now included in the syllabus. A satisfactory feature of the work of this institution is the fact that the passed students have no difficulty in securing well-paid employment. During the year under report every student of the higher classes who passed out found employment on salaries ranging from Rs. 40 to Rs. 120. The artisan classes were well attended and the passed pupils, with whom the Principal makes every effort to keep in touch, were reported to be doing well. There are now six district weaving schools and seven peripatetic weaving schools. These are doing good work under the supervision of the Principal, Serampore Weaving Institute.

6. Owing to the paucity of staff, the assistance which the department was able to render to cottage industries was practically confined to the introduction of improved spinning and weaving appliances. With the appointment of Circle Officers the Director of Industries will be in close touch with the cottage industries of the province, and will in future be able to render them assistance in other directions. The Hon'ble Minister attaches great importance to the spread of co-operative institutions among the cottage workers of the province and arrangements have been made, by which the Director of Industries will work in close co-operation with the Registrar of

Co-operative Societies in this matter.

7. In spite of being hampered by the want of an adequate staff and by the fact that the Director had to devote much of his time to winding up his work as Controller of Munitions, the above review shows that the Department of Industries has made a satisfactory start, and the Hon'ble Minister desires to congratulate Dr. Meek on his successful administration of the department. With the gradual appointment of an adequate staff he is confident that the activities of the department will rapidly extend and its practical utility to the public will be quickly appreciated.

The thanks of the Minister are also due to the members of the Advisory Board of Industries for the valuable assistance which they have

rendered to the department.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS FOR THE PORT OF CHITTAGONG FOR THE YEAR 1920-21.

. GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

CALCUTTA, THE 20TH DECEMBER 1921.

RESOLUTION-No. 4242Mne.

READ-

The Administration Report of the Commissioners for the Port of Chittagong

Income.—The ordinary receipts of the Port Fund during the year amounted to Rs. 4,41,645 as against Rs. 5,41,713 of the preceding year. The fall in the revenue was mainly due to the reduced scale of river dues introduced from the 1st May 1920 and continued till the end of the year under The decline in trade also contributed to the fall in the income.

No Government grant was given to the port during the year.

Expenditure.—The ordinary expenditure amounted to Rs. 5,04,621 and the capital expenditure to Rs. 4,15,157 as against Rs. 6,51,538 and Rs. 2,62,348 in the previous year. The excess of expenditure over receipts was met from the large unspent balance of the Government grants of Rs. 12,75,000 during the year 1919-1920.

Assets and Liabilities .- The value of the Port Commissioners' properties, including cash and securities, as estimated on the 31st March 1921, stands at Rs. 49.93,071 and the liabilities at Rs. 1,54,147 excluding loans from Government for revetment work. The outstanding balance of these loans amounted to Rs. 4,63,670 at the end of the year. An increased and consolidated river due of Re. 1 per ton is being levied on all goods (except bunker coal and fuel oil, the rate of river due on which is annas 4 per ton, and cargo coal and fuel oil, the rate of river due on which is annas 6 per ton),

Dredging.—The steam-dredger Karnafuli was at work on the double moorings and the Inner and Outer Bars for 165 days, dredging 7,526,250 cubic feet at the cost of Rs. z-14-8 per hundred cubic feet. The dredger was under repairs for 115 days in the year, 50 days being occupied in petty. repairs done locally and 65 days (including the period of transit) in thorough ov erhaul and repairs at Calcutta.

Grab-dredging was also carried out on the Ring Bar, and 88,622 cubic feet was removed in 131 working days.

Survey. The annual survey from the mouth of the river to seven miles above Sadarghat Jetty and the surveys of the river opposite the jetties and on the Bars, and other miscellaneous observations disclosed no marked improvement in the navigable channel. In addition to the above surveys, a marine survey of the Karnafuli river was completed under the direction of the Port Officer.

Revetment.—The old revetment required slight repairs in places and some pe tty repairs to the bye-channel bunds were carried out. A length of 4,200 lineal feet of the Gupta Point revetment was completed.

Light-houses and Light-vessels.—The Light-houses and light-vessels were in good order during the Nar, the light-vessel Sarsuti having been removed from her station for on month from the 7th January 1921 for her annual overhaul and repairs uring this period a 54-ton country brig was a sed as temporary lig. In the same position. used as

Shipping.—The total number of ocean-going vessels, inland steamers and sailing vessels entering the Port was 826 as against 842 during the preceding year. Two preliminary enquiries into cases of shipping casualties were held by the Port Officer, but in neither case was any Special Court appointed by Government.

Trade.—The total value of foreign and coasting sea-borne trade shows a decrease of 27 49 per cent. as compared with the value of the previous

year.

Detention of vessels.—Four inward-bound vessels were detained during the year for want of sufficient depth of water over the bars of the Chittagong River, the maximum and minimum periods of detention being six and three days respectively.

Sanitation.—The general health of the Port was good.

General.—The duties of the Port Officer and Secretary were carried on by Commander H. M. K. Moilliet. O.B.E., R.I.M., up to the 12th November 1920, and thereafter by Commander E. C. Withers, C.I.E., R.I.M.

Mr. K. C. De, C.I.E., I.C.S., Commissioner, Chittagong Division, remained

Chairman of the Trust throughout the year.

Second Forecast of the Winter Rice Crop of Bengal, 1921-22.

[Note.—On an average of the five years ending 1919-20 the area under Winter Rice in Bengal has represented some 19.7 per cent. of the total area under rice in British India.]

Character of the season .- As reported in the first forecast, the weather has been favourable throughout for the broadcast aman rice crop. In West Bengal, it was unfavourable for the transplanted rice for the period June to the middle of August. As a result, transplantation proceeded slowly in those tracts until towards the end of August when good rain facilitated the operation. In the East and North Bengal, on the other hand, the conditions were good for the transplanted rice owing to sufficient rainfall during this period. In September a good deal of transplantation was made in West and in parts of North Bengal, with the result that the area shows a considerable increase as compared with the first forecast. The October rains, which are the mainstay of the crop in Bengal, were generally insufficient in the western districts, thereby affecting the yield of crops on high lands. On the whole, it may be said that the broadcast aman rice is good and that the transplanted rice crop is satisfactory.

Acreage. - According to District Officers' estimates, the total area under winter rice amounts to 15,602,800 acres as against 15,187,000 acres in the first forecast of this year and against 15,394,700 and 15,343,800 acres,

respectively, in the corresponding and final forecasts of last year.

Outturn .- From the district returns appended it will be seen that Rangpur and Darjeeling report a bumper crop (i.e., 125 and 117 per cent., respectively). The districts of Khulna, Midnapore, Howrah, Dinajpur, Bakarganj, Chittagong and Noakhali report a normal crop, eleven districts a crop between 83 and 95 per cent. The remaining seven districts report the

Malda 79 per cent.; Burdwan, Bogra and the Chittagong Hill Traets each 75 per cent.; Nadia, Birbham and Bankura report a crop as low as between 58 to 67 per cent.

As compared with the first forecast, the crop has improved in eleven districts, remained stationary also in eleven and has deteriorated in the

According to District Officers' estimates, the provincial outturn works out to 90 per cent. of the normal as against the same estimate last year. But considering the tendency on the part of some District Officers to underestimate the crop, and in view of the favourable weather conditions that obtained in the important districts, I am of opinion that the outturn will not be less than 95 per cent. of the normal this year.

Accepting 95 per cent. as the provincial outturn, the gross yield of cleaned grain from the winter rice crop, on the basis of a normal yield of 121 maunds per acre, amounts to 6,806,300 tons this year as against 6,362,100 tons and 6,341,100 tons, respectively, in the corresponding and

First Forecast of the Spring Oilseed Crops of Bengal, 1921-22.

[Norg.—On an average of the five years ending 1919-20, the area under linseed in Bengal has represented some 5.3 per cent. and that under rape and mustard 19.0 per cent. of the total areas under these crops in British India.]

Explanatory.—Three forecasts are issued for the spring oilseed crops. The present one deals only with the area sown and the general condition of the crops.

Area sown.—Oilseeds are grown chiefly in the Rajshahi, Dacca and Presidency Divisions. In the other two divisions the cultivation is small. The total area under these crops (excepting sesamum for which separate forecasts are issued) is returned at 1,152,300 acres this year as against 1,219,500 acres and 1,233,700 acres (now revised) respectively in the corresponding and final forecasts of last year.

Character of the season.—The rainfall in September though below the normal left sufficient moisture in the soil for the preparatory tillage. The fall in October was markedly in defect especially in the western districts with the result that sowings were curtailed in those tracts though they commenced generally in the usual time. Since then dry weather has prevailed and the present outlook is reported to be only fair.

Section 1.—Leave-Accounts.

1. The leave-account required by fundamental rule 76 shall be maintained in such form as the Auditor-General

may prescribe.

2. (a) The leave-account of a gazetted Government servant shall be maintained by, or under the direction of, the principal auditor responsible for the audit of his pay.

(b) The leave-account of a non-gazetted Government servant shall be maintained by the head of the office in which he is employed.

Section II.—Application for leave.

3. Except as provided in rule 4 an application for leave or for an extension of leave shall be made to the authority competent to grant such leave or extension,

4. An application by a commissioned medical officer in permanent or temporary civil employ for leave exceeding four months, other than leave on medical certificate, or for an extension of such leave, must be submitted to the local administrative medical officer, by whom it will be forwarded to the Director-General, Indian Medical Service. The Director-General will countersign the application, if the state of the public service admits of the grant of the leave; otherwise, he will abstain from countersigning it. In either case, he will forward the application for disposal to the authority competent to grant the leave

5. A Government servant transferred to foreign service must, before taking up his duties in foreign service, make himself acquainted with the rules or arrangements which

will regulate his leave during such service.

Section III.—Medical certificates.

Medical officers must not recommend the grant of General rules. leave in any case in which there appears to be no reasonable prospect that the Government servant concerned will be fit to resume his duties. In such cases, the opinion that the Government servant is permanently unfit for Government service should be recorded in the medical certificate.

7. Every certificate of a medical committee or a medical officer recommending the grant of leave to a Government servant must contain a proviso that no recommendation contained in it shall be evidence of a claim to any leave not admissible to the Government servant under the terms of his contract or of the rules to which he is subject.

8. Before a gazetted Government servant can be Procedure in the ranted leave, or an extension of leave, on medical case of ertificate, he must obtain a certificate in the following orm or as nearly in that form as the circumstances servants. permit :---

"I, A. B., Surgeon at (or of).....do hereby certify that C. D. of the. service (or Department)

bad state of health, and I solemnly and sincerely declare that, according to the best of my judgment, a change of air is essentially necessary to his recovery, and do therefore recommend that he may be permitted to proceed to......"

This certificate should be accompanied by a statement of the Government servant's case in such form as the local

Government may prescribe.

9. Having secured such a certificate, the Government servant must, except in cases covered by rule 12, obtain the permission of the head of his office or, if he himself is the head of an office, of the head of his department to appear before a medical committee. He should then present himself with two copies of the statement of his case before such a committee. The committee will be assembled under the orders of the Administrative Medical Officer of the province, who will, where practicable, preside over it. The committee will be assembled either at the headquarters of the province or at such other place as the local Government may appoint.

10. Before the required leave or extension of leave can be granted, the Government servant must obtain from

the committee a certificate to the following effect :-

11. Before deciding whether to grant or refuse the certificate, the committee may, in a doubtful case, detain the applicant under professional observation for a period not exceeding fourteen days. In that case it should grant

to him a certificate to the following effect:-

- 12. If the state of the applicant's health is certified by a commissioned medical officer of Government or by a medical officer in charge of a civil station to be such as to make it inconvenient for him to present himself at any place in which a committee can be assembled, the authority competent to grant the leave may accept, in lieu of the certificate prescribed in rule 10, either:—
 - (a) a certificate signed by any two medical officers, being commissioned medical officers or medical officers in charge of civil stations, in whatsover province they may be serving; or
 - (b) if the authority considers it unnecessary to require the production of two medical opinions, a certificate signed by an officer in medical charge of a civil station and counters thed by the Collector of the District or the Division.

13. The grant of a certificate under rule 10 or 12 does not in itself confer upon the Government servant concerned any right to leave. The certificate should be forwarded to the authority competent to grant the leave, and the orders of that authority should be awaited.

14. An application by a non-gazetted Government servant in superior service for leave, or for an extension of leave, on medical certificate, must be accompanied by a certificate from the applicant's medical attendant. Such certificate should distinctly state the course of the illness,

Procedure in the case of nongazetted Government servants in superior service.

its symptoms, probable causes and duration, and the period of absence from duty considered to be absolutely necessary for the restoration of the applicant's health. It should be countersigned by a Presidency Surgeon, if the applicant is in a Presidency town; otherwise, by the officer in chief medical charge of the district in which the applicant resides. The authority competent to grant the leave may, however, in its discretion accept a certificate from the applicant's medical attendant without such countersignature; or, if the applicant be a female, may either dispense with countersignature or accept the countersignature of any female medical practitioner.

15. No certificate should be submitted for counter-signature without the cognisance of the head of the office

in which the applicant is serving.

16. The countersigning officer may, in his discretion, require the applicant to appear before him, unless it appears from the certificate of his medical attendant that he is too ill to bear the journey. In the latter case, the officer may, after careful investigation of the case, either countersign the certificate or refuse to do so, as he thinks fit.

17. In support of an application for leave, or for an Procedure in the extension of leave on medical certificate from a non- case of gazetted Government servant in inferior service, the authority competent to grant the leave may accept such certificate as it may deem sufficient.

Section IV.—Grant of Leave.

18. In cases where all applications for leave cannot, in the interests of the public service, be granted, an authority competent to grant leave should, in deciding which application should be granted, take into account the following considerations:-

(a) The Government servants who can, for the time

being, best be spared.

 (b) The amount of leave due to the various applicants.
 (c) The amount and character of the service rendered by each applicant since he last returned from leave.

(d) The fact that any such applicant was compulsorily recalled from his last leave.

(e) The fact that any such applicant has been refused leave in the public interests.

19. When a medical committee in India has reported that there is no reasonable prospect that a particular Government servant will ever be fit to return to duty, leave should not necessarily be refused to such Government servant. It may be granted, if due, by a competent uthority on the following conditions:

(a) If the manical committee is unable to say with certains that the Government servant will never be fit a service in India again, leave not exceeding twelve months in all may be granted. Such leave should not be extended without a further reference to a medical committee.

(b) If the medical committee declares the Government servant to be completely and permanently incapacitated for further service in India, the Government servant should, except as provided in clause (c) below, be invalided from the service, either on the expiration of the leave already granted to him, if he is on leave when examined by the committee, or, if he is not on leave the date of the committee report.

(c) A Government servant declared by a committee to be completely and permanently incapacitated may, in special cases, be granted leave, or an extension of leave, not exceeding six months as debited against the leave account, if such leave be due to him. Special circumstances justifying such treatment may be held to exist when the Government servant's breakdown in health has been caused in and by Government service, or when the Government servant has taken a comparatively small amount of leave during his service or will complete at an early date an additional year's service for pension.

20. Leave should not be granted to a Government servant who ought at once to be dismissed or removed from Government service for misconduct or general

incapacity.

21. If, in a case not covered by rule 20, an authority competent to remove a Government servant from service decides, before such Government servant departs from India on leave, that he will not be permitted to return to duty in India, it must inform him to that effect before he leaves India.

22. If, when a Government servant is about to depart from India on leave, it is necessary to consider the propriety of removing him for incapacity, whether mental or physical, which is of such a nature that it is impossible to decide, before he leaves India, whether it will be permanent or temporary; or if for any reason it is considered inexpedient that a Government servant on leave should return to India, a full report of the circumstances must be made by the local Government to the India Office in time to enable the Secretary of State in Council to take any necessary measures before the Government servant would in the ordinary course be permitted to return to duty. The report should in any case reach the India Office at latest three months before the end of the Government servant's leave.

23.
